Enterprise Procurement SOP & Approval Thresholds

Document ID: DOC-PROC-2026-002 | Version: v4.2 | Confidentiality: Internal

Section 1: Automated vs Human-in-the-Loop Purchasing Thresholds

This specification defines the strict monetary approval thresholds enforced by the Enterprise AI Digital Assistant system. Transactions within specified tiers trigger automatic API executions, Human-in-the-loop interrupts, or multi-signature executive reviews.

Amount Range (RMB)	Approval Node	System Control Action	Required Documents
Amount <= 5,000	Auto Approve	Agent directly calls create_purchase()	Purchase Request
5,000 < Amount <= 50,000	Supervisor Approval	Agent triggers Interrupt for Human-in-the-loop	PR + 2 Vendor Quotes
50,000 < Amount <= 200,000	Manager + CFO + Director	Triggers multi-signature approval chain	PR + 3 Quotes + Contract
Amount > 200,000	Manager + VP + CEO + Board	Mandatory RFP & Board resolution required	RFP Report + Board Resolution

Section 2: 3-Way Invoice Matching & Audit SOP

Prior to initiating financial disbursement, the accounts payable department must execute 3-Way Matching: (1) Approved Purchase Order, (2) Signed Goods Receipt Note, and (3) Validated VAT Invoice. Disbursements are executed within Net 30 payment terms upon successful matching.
